

Made in Luxembourg

2011

CONGRATULATIONS TO THE
SCHLECK BROTHERS

The power and endurance used for this performance “Made in Luxembourg” clearly stress what Luxembourg stands for.

For more than two decades, the Luxembourg economy has consistently performed at the highest levels, with strong growth, high international trade surplus, low unemployment and low inflation in a stable, innovative environment for business and consumers alike. Once again speed, agility, and performance within strong teams have proven that Luxembourg is competitive on an international level.
